

Preços do Abacate

Hanna Rodrigues Ferreira

28 maio,2021

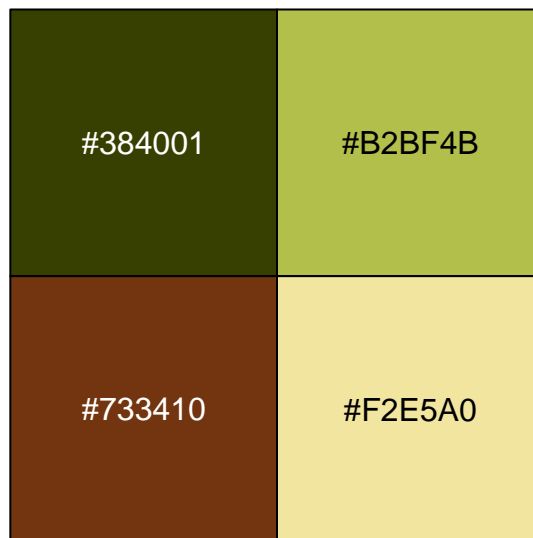

Dados do dataset Avocado Prices, paleta de cor extraída de imagens de abacate :

```
library(gapminder)
library(tidyverse)
library(scales)

data <- read.csv('avocado.csv')
```

```
dark_green = "#384001"
green = "#B2BF4B"
brown = "#733410"
beige = "#F2E5A0"

show_col(c(dark_green, green,brown,beige))
```

```
data %>%
  ggplot(aes(x = AveragePrice,
             y = reorder(region, AveragePrice),
             color = type, fill = type)) +
  geom_boxplot() +
  scale_color_manual(values = c(brown,dark_green)) +
  scale_fill_manual(values = c(beige,green)) +
```

```
theme_minimal() +  
guides(color = FALSE) +  
theme(legend.position = 'top') +  
labs(title = "Avocado's average price per region", y = NULL, x = "average price")
```

Avocado's average price per region
